Mountain Weather Forecast

Northwest Highlands

Including Sutherland, Ben Wyvis, Wester Ross, The Cuillin, Glen Affric, Glen Shiel and Knoydart
Forecast valid from 00:00 on Wednesday 07 Apr 2021 until 23:59 on Thursday 08 Apr 2021

Forecast Issued on Tuesday 06 Apr 2021 at 11:02 by Met Office Aberdeen

Confidence: High for continuing cold conditions across the hills with further snow for most areas, but also some brighter interlues in between. Lower confidence for higher windspeeds through Thursday night.

Headline for Wednesday 07 Apr 2021: Remaining bitterly cold but snow showers will fade and winds will gradually ease.

Forecast for Wednesday 07 Apr 2021

Weather: Northerly winds will maintain a feed of heavy snow showers across all ranges which will bring temporary blizzard conditions through morning. Some shelter likely across Skye. Showers fading through the day with some sunny breaks leading to some glare off lying snow. A band of snow will spread east after dark, this falling as rain at lower levels.

Chance of cloud free mountain/hill tops above 800m: 40% becoming 75% by afternoon.

Visibility: Snow showers will bring areas of cloud down to 300-500m through morning but as these fade, cloud will become more occasional above around 600-800m with plenty of breaks between. Heavier showers will bring whiteout conditions to all but lowest levels.

Met Office Aberdeen Meteorologist's View
Bitterly cold but less windy than previous days but be aware of strengthening winds after dark.

Forecast for Thursday 08 Apr 2021
Weather: A cold and windy day with rain or snow never far away and often on the heavy side, especially through afternoon. The snow level will be higher than previous days, with snow confined to above around 700m but blizzard conditions are likely on higher ground. Very cold air returns through evening with blizzard conditions extending towards Glen level.

Maximum wind: West 30-40 gusting 50-60mph, likely closer to 75mph through evening, especially in the north.

Chance of cloud free mountain/hill tops above 800m: 20%.

Visibility: Cloud will be quite persistent above around 600-800m across all areas with breaks confined to more sheltered eastern slopes across Easter Ross. Visibility will be generally very poor above this especially with frequent blizzard conditions. Rain will turn lower slopes hazy, especially later in the day.

Temperature: **Glens:** 4-6 Celsius, falling 2 or 3 through evening.
At 800m: Minus 1 or 2 Celsius.
Freezing level: 800-1000m, falling 400m later evening.
